Metagenomics Course 2015

Submitted by marianadeoliveira on Mon, 01/12/2015 - 13:00

Date

2nd to 06th February 2015 9:00 AM to 6:00 PM Total: 40 hours

Description

The course is aimed towards students, post-docs and researchers novice to metagenomics. The course will provide training in: data generation, experimental design, statistical considerations, sampling methods, data generation for 16S, shotgun and transcriptome, data analysis for diversity and functional studies, metadata analysis, single cell genomics.

Registration (Limited Availability)

If you need a certificate to get credits, register [here](#)

If you don't need credits, register [Here!](#)
